

Technical tips for enrolling online:

- KHRIS requires Internet Explorer 8 as the browser. Other internet browsers such as Firefox, Google Chrome and Safari are not compatible viewers for the KHRIS website.
- The most recent version of Adobe Reader needs to be installed to correctly view/display forms in the KHRIS Self Service Website.
- Pop-up blocker should be disabled.
- For users running Internet Explorer 9 there is a built in Compatibility View setting which can be activated to allow users to emulate Internet Explorer 8 and successfully view and navigate the site.
- If using a laptop or having difficulty viewing the entire page, you may need to decrease the zoom setting to view the screen in its entirety.
- Please use the logout button at the top right to fully logout before closing the browser window with the X.
